

HANOVER GREEN

VETERINARY CLINIC

Wisdom Panel™MX

“I think Zeus is part Rottie, part Shepherd.” “Nah, he’s part Newfie, part Border Collie, but has the markings of a Dobie.” If you want to know what ‘parts’ your dog has, we can help. By sending out a simple blood test, we can get back results telling us what breeds make up your mixed breed dog. This not only explains personalities and looks, but can also help with future medical treatment of diseases that may only affect certain breeds. Call us or visit www.marsveterinary.com for more information.

Ask any staff member for more information.
