

To the Doctors AND Staff AT HANOVER GREEN,

Thank you all so much for your kind donation of the spay for "Elric's Angel" for his Make A Wish. Angel was taken to her new home on July 18th and words can not express the joy you helped bring to this little boy and his family. Elric has a rare form of pediatric brain cancer called DIPG. This cancer has affected Elric's speech and motor function and has left him confined to a wheel chair. When I arrived to deliver Angel, she ran right to him,

jumped up and licked him! What touched my heart was when Elric unbuckled his seatbelt from his wheelchair and slid onto the floor to be closer to her. She was as gentle with him as he was with her. His smile did not leave his face and he moaned "I love you" to her. He even had his mom and dad take him to the store so he could choose toys for her. I have enclosed pictures of Elric and his Angel so you could see the smile you helped bring to this child's face. Thank you again!
